Features

- Support for ARM7, ARM9, Cortex-M0, Cortex-M1, and Cortex-M3 devices,
- [µVision](#) IDE, debugger and simulation environment.
- ARM industry-leading C/C++ compiler from ARM.
- [MicroLib](#) highly optimized run-time library.
- [Real-Time Trace](#) for Cortex-M3 processor based devices.
- Detailed start-up code for microcontroller devices using the [Device Database](#).
- Flash programming algorithms for [ULINK Products](#).
- [CMSIS](#) Cortex Microcontroller Software Interface Standard compliant,
- Extensive range of examples and template to enable you to begin working on your project as quickly as possible.

MDK is available in [Standard](#) and Basic (256KB code size limited) variants. More information is available on the [Product Selector](#) page.

Note

- MDK-Basic does not support any components of [RL-ARM](#). The [full version of MDK](#) is required to use RL-ARM.
- An evaluation version of MDK (32KB-limited) is available for [download](#). It does not require a serial number or license key.
- The evaluation version can be converted into a full (unrestricted) version with a valid Product Serial Number.
