Part Number: TPG100011 - Softlog ICP2PORT-PX Portable In-Circuit Production Programmer TPG100011

A member of the ICP family of high-speed, production-grade in-circuit programmers. This compact, battery-powered device supports up to six different programming environments, making it an ideal, low-cost solution for field upgrades.

ICP2PORT-PX programs Microchip 8-bit PIC® MCUs, 16-bit PIC MCUs & dsPIC® DSCs, 32-bit PIC MCUs, and serial EEPROMs. It features fast programming, 50 mA Vdd drive current, programmable Vdd (2.0 to 5.5V) and Vpp (2.0 to 13.5V), programmable Vdd source (programmer or target), programmable clock/data speed (500 KHz to 10MHz), 4 MB on-board flash memory, and a counter to limit the number of devices programmed. Powered by 3 AAA batteries, USB, or Adapter.
