

BeagleBoard.org Proto Cape

PROCPE-BBBCAPE

Provides a blank slate to design any type of application that you can imagine. Along with plated through-holes for external component soldering, there are a few on-board components, such as buttons, a multi-colored LED, and a basic LED to assist in the design process. The ID EEPROM is also capable of having the address be re-assigned to allow for a seamless integration into the BeagleBone cape schema.

- 2x push-buttons
- RGB LED
- single-color LED
- I²C EEPROM
